

## Rotary Indexing Parts Washer

*Designed for Lean Manufacturing work cells  
for cleaning machined and finish ground parts*

- Compact cellular design
- High pressure spray cleaning
- Pick and Place/ Robotic/ Manual loading
- Quick change over for different parts
- Load 1 or 2 parts per index
- Over 20 indexes per minute
- Environmentally safe Aqueous Cleaning
- Cycles for: Wash-Rinse-Rust prevent
- Energy efficient parts drying
- Stainless steel construction
- Micron filtration for precision cleaning
- Coalescing oil removal system

Pick and Place / Robotic / Manual loading

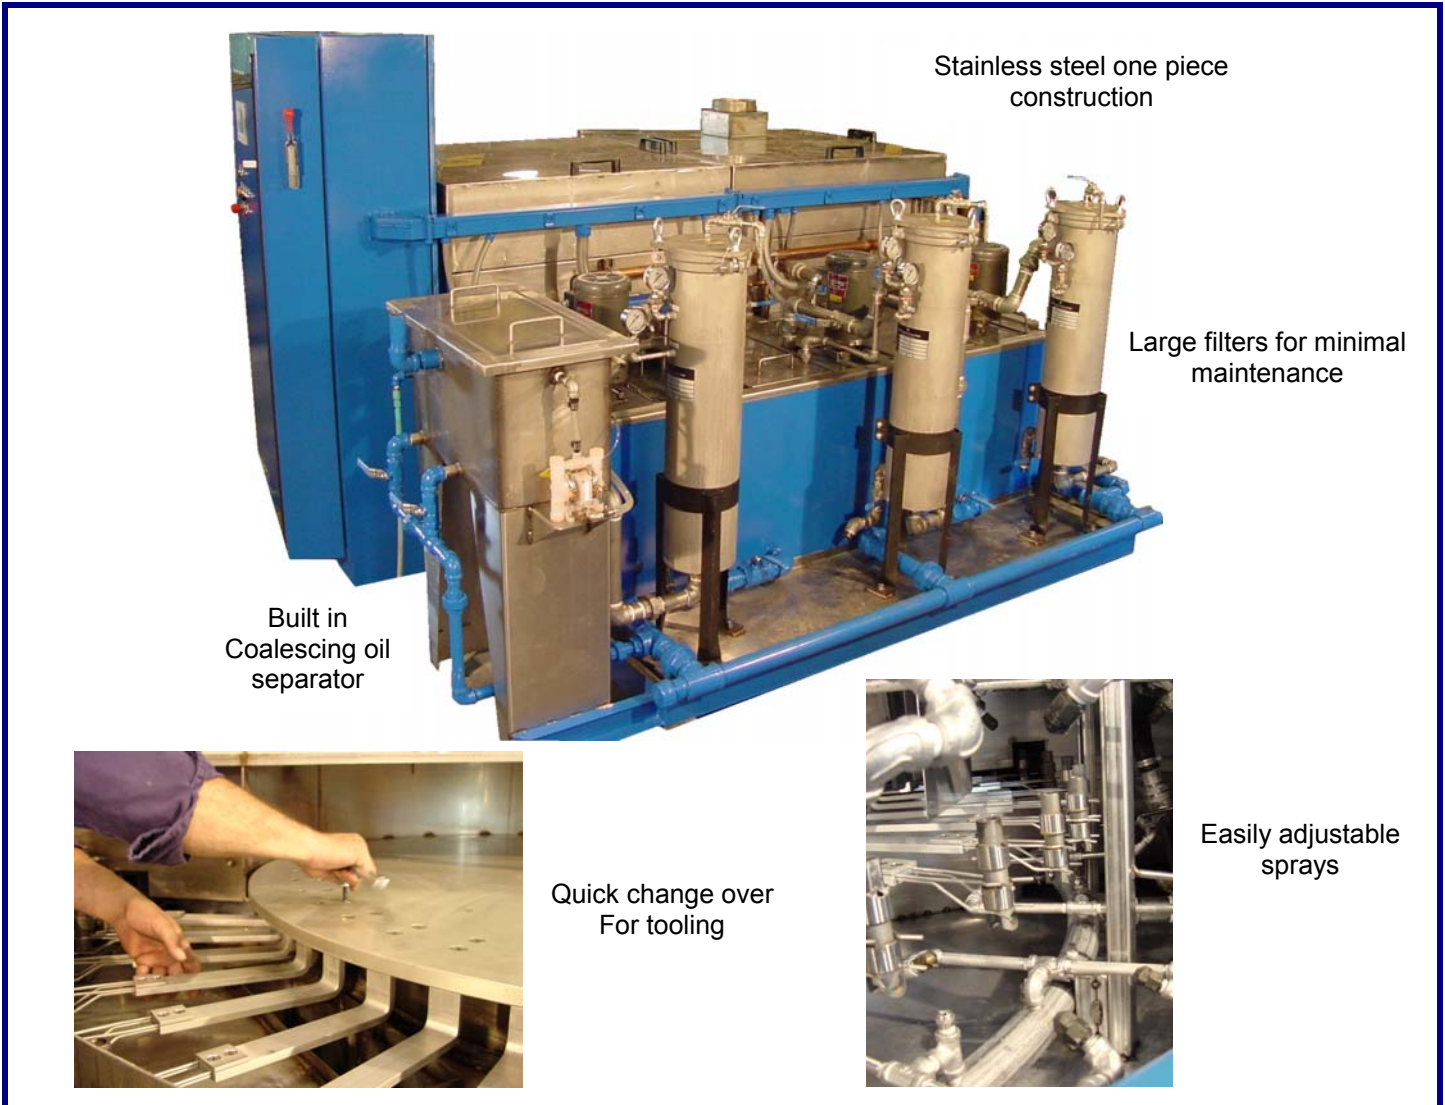

Front load-unload

Quick change over

Stainless steel one piece construction

Large filters for minimal maintenance

Built in Coalescing oil separator

Quick change over For tooling

Easily adjustable sprays

## SPECIFICATIONS

24" to 72" Turntables precision machined for .010 indexing accuracy  
Polished stainless steel machine enclosure  
Lift off covers for quick and easy access to sprays  
Stainless steel spray headers  
Sloped bottom tanks for 100% draining

Insulated tanks and dryer  
Smart water management system  
Spot Free Drying  
Vertical in tank seal-less pumps  
One day run off with chemistry prior to shipping  
Single point connections for one day installation

## OPTIONS

HEPA filters for dryer  
Energy efficient recirculating hot air convection dryers  
Marine type tank clean out doors  
Automatic chemical control systems  
Continuous chip removal and collection  
Micron and sub micron filtration
