LJ Mini Drum

Flexible Design with Up to 5 Tanks

- > Wash
- > Rinse
- > Wash, Rinse & Rust Prevent
- > Etching Sealing or Coating
- > Additional Tanks for Passivation
- > Heated Blow off
- > Recirculating Hot Air Dryer for Energy Savings (19" only)

The JenFab LJ Series Rotary Drum Parts Washers are economically priced compact self contained machines that clean parts fed on a continuous basis.

Ideal for In-line cleaning from stamping presses, cold headers, thread rollers molding, dies casting and screw machines or for installation as stand alone cellular parts washers.

A combination of Spray and Immersion is used to clean the parts as they gently rotate inside the drum.
