

Vertimatic Series Ultrasonic Precision Cleaning Systems

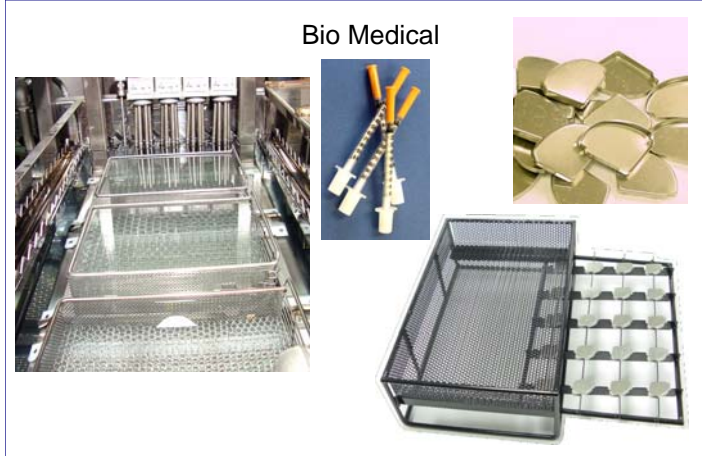

Over Forty Years of Building the Best Vertical Agitation Cleaning Machines

- ◆ JENFAB *Aqueous* Vertical Agitation systems clean better and cost less than solvent systems
- ◆ Precision Ultrasonic Cleaning Frequencies 20 kHz 25 kHz 40 kHz 80 kHz
- ◆ Spot Free Drying
- ◆ Up to 80% less water and chemical usage than cabinet systems
- ◆ Minimum floor space requirements
- ◆ Parts are Agitated UP & DOWN in solution for faster and better cleaning
- ◆ Available Basket rotation combined with Vertical Agitation adds new dimension to parts cleaning
- ◆ Skip station capability provides multiple process cycles allowing ferrous and non ferrous parts to run simultaneously

Cellular, Central & In-Line Cleaning

- Flux Removal
- Precision Bearing
- Electronics
- Glass
- Screw Machine
- Precision Forming
- Machined Parts
- Pharmaceutical

- ◆ Vertical agitation combines the natural cleaning power of water with the hydrokinetic energy developed when parts are agitated up and down,
- ◆ Vertical Agitation Cleaning Action is enhanced by adding:
 1. Basket Rotation
 2. High Pressure Submerged Spray [spray under immersion]
 3. Ultrasonics for precision cleaning

Ultrasonic Cleaning with Basket Rotation and Vertical Agitation

SPECIFICATIONS

Stainless steel construction for all wetted surfaces
Energy efficient recirculating air dryer with HEPA Filtration
Spot free drying
Micron filtration

Hydraulic or pneumatic operation
Production Proven for over Forty Years
Single point service connections allow one day installation
Software package for multiple process cycles and diagnostics

OPTIONS

- ◆ Ultrasonics 20 kHz 25 KHz 40 KHz 80 kHz with higher frequencies available
- ◆ Marine type clean out doors
- ◆ Automatic chemical control systems
- ◆ Coalescing oil separation systems
- ◆ Ultra Filtration, DI and Reverse Osmosis

*Try Your Parts in Our
Production Size Test Machines*
